Education

2020-2024 BSc Computer Science and Engineering / TU Delft

(expected) I am currently 3d year student. During studies I learned about variety of

technologies and gained a lot of team working experience.

2019-2020 Vilnius School of Al

Ai focused community in Lithuania. There I learned about topics related to data analysis from Data science to Deep learning and developed multiple Ai related projects including analysis of Board games marked and Image clustering system based on cnn.

2016-2020 **Sofijos Kovalevskajos gymazium** / Vilnius

My highscool where I choose focus on the Math, Informatics and Physics.

Work Experience

2023 Software Engineer Intern,

IoT Predictive maintenance project: MakeTek

During my studies I worked a part time developer job at Everspring - dropshipping company that directly connects retailers and growers. During my work I got experience of

2022-2023 Full stack delveloper Django/ReactJS: Everspring

During my studies I worked a part time developer job at Everspring - dropshipping company that directly connects retailers and growers. During my work I got experience of

2021-Present **Software Engineer / Mentor:** Dream Team Epoch

During first year of my studies I was Software engineer at the AI focused TU Delft dream team. We competed in worldwide AI competitions on kaggle and other platforms. I got experience with variety of deep learining challenges and used Computer Vision, NLP and Reinforcement learining techniques.

2017-2018 Full-stack developer

Shortly after starting to get into the world of computers I decided to try my skills in a real world and completed multiple projects with PHP and JS that I found on free-lance websites.
